Full job description

Job Role: Web & Application Developer

Job Type: Full-time (Onsite/Office)

Location: TGU Tower, Cebu IT Park

RESPONSIBILITIES:

Job Summary

We are looking for a skilled and versatile Web and Application Developer proficient in the MERN stack and Next.js to build high-performance web platforms, mobile applications, and AI-powered solutions. The ideal candidate will also have experience integrating workflows and automating processes using Microsoft Power Automate, as well as creating and enhancing applications with AI capabilities to improve user experience and operational efficiency.

Key Responsibilities

Web & Application Development

- Design, develop, and maintain applications using the MERN stack (MongoDB, Express.js, React, Node.js).
- Build responsive, high-performance websites using Next.js, focusing on SEO, scalability, and performance.
- Develop and maintain web-based and mobile-friendly applications (React Native or similar).
- Integrate APIs, databases, and third-party services into applications.

AI Application Development

- Design and develop AI-powered features and applications, leveraging machine learning models, natural language processing, and other AI frameworks.
- Enhance existing applications with AI capabilities such as chatbots, recommendation engines, and predictive analytics.
- Integrate AI APIs into web and application projects.

Automation & Integration

- Design, build, and maintain Power Automate flows for process automation and system integration.
- Connect applications to Microsoft 365 services (SharePoint, Teams, Outlook, etc.) via Power Automate.
- Automate repetitive tasks to improve operational efficiency.

System & Application Maintenance

- Ensure applications are secure, optimized, and scalable.
- Troubleshoot, debug, and upgrade existing systems.
- Write clean, maintainable, and well-documented code.

Collaboration

- Work closely with cross functional teams to deliver projects on time.

Requirements

- Bachelor's degree in Computer Science, Information Technology, or related field (Diploma or equivalent experience acceptable).
- Proven experience with the MERN stack.
- Proficiency in Next.js for building high-performance websites.
- Experience in application development, including mobile-friendly and cross-platform solutions.
- Strong understanding of RESTful APIs, GraphQL, and web services integration.
- Familiarity with AI development, including integrating AI APIs and enhancing applications with machine learning features.
- Experience with automation workflows using Microsoft Power Automate.
- Proficient in version control (Git/GitHub/GitLab).
- Strong problem-solving skills, attention to detail, and ability to manage multiple projects.
- Strong background in application security best practices.

Job Types: Full-time, Permanent

Pay: Php28,000.00 - Php30,000.00 per month

Schedule:

- Monday to Friday

Ability to commute/relocate:

- Cebu City, Cebu: Reliably commute or planning to relocate before starting work (Preferred)

Application Question(s):

- Please provide your portfolio.
- What is your expected salary?

Education:

- Bachelor's (Required)

Experience:

- IT Ops Monitoring Platform (e.g. OpsRamp, Datadog etc): 1 year (Required)
- Web Developer: 1 year (Required)

Work Location: In person
